### Maths

#### BEDMAS word problems

1. Solve the following word problems
  - a. Olivia has 3 boxes of pencils. Each box comes new with 14 pencils. She has lost 5, how many does she have altogether now?
  - b. Omar bought 3 new games each costing R89. If he had R350 before he bought them, how much does he have now?
  - c. Shane has 26 biscuits. His friend Dwyane has 3 times as many. How many biscuits do they have together?
  - d. Lily went to the shop. A bag of toffees costs R24 and a bag of Jellytots costs R13. How much more would she spend if she got 2 bags of toffees instead of 3 bags of Jellytots.

#### Super challenge:

1. Emily has 23 books at home. Her school is having a book drive and her class of 25 want to donate 75 books together. If they each donate the same number of books, how many will Emily have left after donating her share?
